GLASS SUBSTRATE AND DISPLAY APPARATUS

G00002

ABSTRACT OF THE DISCLOSURE

Glass substrates for display apparatuses of the related art which is cut from the mother glass have different glass size from each other in accordance with demand of
5 respective display apparatus manufacturing company or factory. Therefore, it is not always effective to form glass substrates by cutting the mother glass, and the mother glass is not used efficiently.

The present invention is characterized in that when a glass substrate is prepared by cutting a rectangular mother glass, one side of the mother glass is one side of the
10 glass substrate and the mother glass has a length equal to a length of the one side of the glass substrate.
