Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group (CG) and the experimental group (EG). The CG was subjected to a control protocol (CP) and the EG to an experimental protocol (EP). The CP consisted of a baseline (BL) and a post-baseline (PB) period. The EP consisted of a baseline (BL), a post-baseline (PB), and a post-exercise (PE) period. The subjects were subjected to a 10-min rest period (R) before the baseline (BL) and a 10-min rest period (R) after the post-baseline (PB) and post-exercise (PE) periods. The subjects were subjected to a 10-min rest period (R) before the baseline (BL) and a 10-min rest period (R) after the post-baseline (PB) and post-exercise (PE) periods.
