(54) Title: EXCHANGEABLE SEPARATION INSERT

Fig. 3

(57) Abstract: The present invention provides an exchangeable separation insert (1) for a centrifugal separator (100) comprising a rotor casing (2) enclosing a separation space (17) in which a stack (19) of separation discs is arranged, and first and second stationary portions (3, 4). A feed inlet (20) supplies a fluid mixture to said separation space (17). The insert further comprises a light phase outlet (21) and a heavy phase outlet (22). Said feed inlet (20) is arranged at a first axial end (5) of said rotor casing (2). One of said light phase outlet (21) and heavy phase outlet (22) is arranged at a second axial end (6). A first rotatable seal (15) seals and connects said feed inlet (20) and a second rotatable seal (16) seals and connects one of said light phase outlet (21) and heavy phase outlet (22).
