Abstract

Process for removing halogenated organic compounds from waste gases

A process for removing halogenated organic compounds from waste gases optionally containing NO_x , in which the waste gas is optionally supplemented with SO_2 , optionally led through a fixed bed or fluidized bed of a solid and contacted with Caro's acid or one of its salts. The Caro's acid can be produced *in situ* by adding H_2O_2 and optionally H_2SO_4 .
