A B S T R A C T

PROCESS FOR MANUFACTURING ELASTICALLY
STRETCHABLE AND CONTRACTIBLE COMPOSITE SHEET

5

A process for manufacturing a composite sheet 1 by joining a second web 52a made of thermoplastic synthetic fiber and capable of inelastic extension to at least one surface of a first web 41a capable of elastic stretch and contraction in an intermittent manner, includes a step of extending the first web 41a, a step of joining the second web 52a to the extended first web 41a and a step of extending the joined first and second webs 41a, 52a.
