Unlimited Participants Network

- 5 A method for communication between a number of participants in a region, the number of participants being unlimited, the method comprising the steps:
- (a) allocating a unique identity to each participant;
 - (b) allocating an order of priority for transmission by the participants based on an order of the unique identities; and
- 10 (c) in each transmission of each participant there is included:
- (i) the unique identity of the participant; and
 - (ii) a list of unique identities of all participants in the region.
