

PACKAGING ARRANGEMENT FOR CONTACT LENSES

1

ABSTRACT OF THE DISCLOSURE

5 A base member for a blister package for the
containment of a contact lens includes a planar flange
extending outwardly about a cavity for housing the
contact lens. Proximate the peripheral edge of the
flange, there is formed a continuous groove into which
there is pressed the material of a flexible cover sheet
of the blister package so as to clampingly engage the
10 base member.
