

ABSTRACT

The present disclosure relates to the technical field of wireless communications and provides a relay determination method and apparatus. The method comprises: determining a relay determination strategy of a terminal device according to state information of the terminal device (101), and determining a relay terminal device of the terminal device according to the determined relay determination strategy (102), such that the terminal device may select different relay determination strategies according to different states and determine different relay terminal devices, thereby improving communication performance of the terminal device.
