

## **METHOD FOR CUTTING LIQUID CRYSTAL PANEL WITH LIQUID CRYSTALS**

### **ABSTRACT**

The invention relates to a method for cutting a liquid crystal panel with liquid crystals, which adopts the means of determining the cutting line and the cutting depth in view of different surfaces and cutting the liquid crystal panel with the liquid crystals twice. According to the method for cutting the liquid crystal panel with the liquid crystals, provided by the invention, a non-standard liquid crystal panel cut by the technical proposal can be used for cutting finished products of liquid crystal panels with liquid crystals and non-standard liquid crystal panels can be obtained with no damage to the liquid crystal panels, and thus the cost of the non-standard liquid crystal panels can be greatly reduced.
