(54) Title: A FOAMED PRODUCT DISPENSING SYSTEM, PRODUCT CONTAINER, AND PRODUCT DISPENSING MACHINE

(57) Abstract: A foamed product dispensing system, wherein the system includes: a product dispensing machine, configured to receive an exchangeable product container; a product container, configured to cooperate with the product dispensing machine, after placement in the machine; wherein the product container contains a foamable product, preferably a food product, for example cream, wherein the product container is provided with a product processing unit including a frothing device having a product entrance for receiving product and a product exit for discharging product, wherein the processing unit is connectable to a gas supply for supplying gas to the product, wherein the system wherein the system is configured to dispense foamed product at a predetermined overrun which is larger than 200%.
