(54) Title: OBFUSCATION ON EXPOSED PUBLIC API FROM SOFTWARE LIBRARY

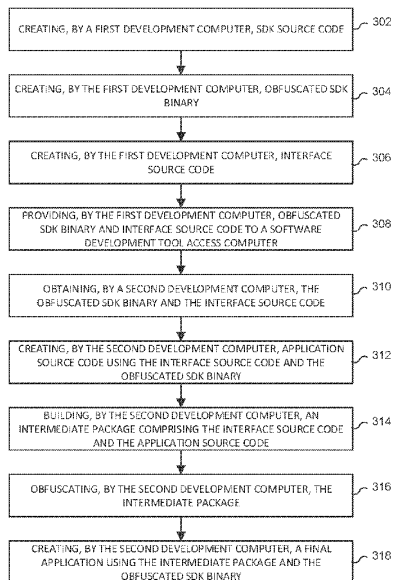

FIG. 3

(57) Abstract: A method for creating a final application includes a computer obtaining an obfuscated SDK binary and an interface source code that comprises one or more functions that call obfuscated functions within the obfuscated SDK. The computer then creates application source code that calls functions in the interface source code. The computer builds an intermediate object comprising the interface source code and the application source code. The computer then creates the final application using the intermediate object and the obfuscated SDK binary.
