

PACKAGING SEAL PLATE HAVING A SHAPED FACE

ABSTRACT

A seal plate (20) for use in sealing ophthalmic lens blister packages having a laminate foil cover and plastic shell for containing an ophthalmic lens and lens solution therein, the seal plate including a heated plate body (22) and sealing face (25). The sealing face protrudes from the plate body and has an irregular shape. The sealing face further engages the laminate foil cover and displaces moisture present between the foil cover and plastic bowl body to induce a heat seal therebetween.
