claims and to be republished in the event of receipt of
amendments (Rule 48.2(h))

(54) Title: KEY COMBINATION ELEMENT IN KEY BLANK AND KEY

FIG. 2

(57) Abstract: A key device includes a generally elongate shaft portion that has first and second oppositely directed side surfaces, at least one of which is cuttable to form key cuts that define a key combination surface. First and second key combination elements, disposed in the elongate shaft portion, are side-by-side one another at different lateral positions along the width of the elongate shaft portion and located at overlapping longitudinal positions along the length of the elongate shaft portion. The first and second key combination elements are each pivotable about a pivot axis.
