(54) Title: METHOD AND APPARATUS FOR CHANGING THE CONFIGURATION OF AN ONGOING STREAMING SESSION

(57) Abstract: A method, apparatus and computer program product are provided for notifying a client device, such as a mobile terminal, as to an upcoming change to the configuration of an ongoing streaming session such that the subsequent change to the configuration of the streaming session may be accomplished in an efficient manner. The method, apparatus and computer program product may be configured to effect the change in the configuration of the streaming session even in instances in which the ongoing streaming session is relying upon a non-persistent session control connection.
