

ABSTRACT

MANAGEMENT SYSTEM AND MANAGEMENT METHOD FOR PACKAGES OF SHUFFLED
PLAYING CARDS

5 To prevent a loss or replacement of card packages while
operating casinos using packages of multiple cards in the casinos
or other card game facilities using card game tables, a management
system for managing packages of shuffled playing cards is
provided. The management system including a management control
10 device (7) stores ID codes (4) attached to a plurality of packages
(2) brought into a management/storage box (10), constructs a
database, reads the ID codes (4) of the plurality of packages
(2) brought into the management/storage box (10) at predetermined
time intervals, confirms existence of each ID code (4) registered
15 in the database in the management/storage box (10), and manages
the ID codes (4) of the packages (2) before use and the ID codes
(4) of the drawn packages (2).
