

ABSTRACT**BALACLAVA FOR HEAD PROTECTION**

5 The invention relates to a hood (1) having an outer face (2) provided in
contact with a surrounding environment, an inner face (3) provided to be in contact
with a user's head, a head passage section (4) and a facial opening (5) at the user's
eye level, which is closed by a visor (6) detachably fastened to the hood (1) and
inserted between the inner face of a lining (7) and a bearing element (11).
