(54) Title: COMPRESSED AIR COOLING SYSTEM FOR DATA CENTER

FIG. 1

(57) Abstract: A system for removing heat from components in a computer room of data center includes one or more air storage containers that hold compressed air, one or more compressors that supply compressed air to the air storage containers, and one or more plenums in fluid communication with at least one of the storage containers. At least one of the plenums can supply air to a computer room.
