

ABSTRACT

A hand push cart (10) has a cart body (15) and a basket member (70) attached to the cart body (15). The cart body (15) has a pair of legs (23) spaced apart from each other in a width direction, wheels (24) respectively held on lower end portions of a pair of the legs (23), a cross member (25) extending between a pair of the legs (23) or a pair of the wheels (24), and a stepping member (40) provided on the cross member (25). The basket member (70) has a basket body (71) forming a housing part, and a third attachment member (72C) extending from the basket body (71) to attach the basket body (71) to the cart body (15).
