1902
A UE determines *M* RO cell group(s)
1904
The UE determines at least one RO UE group includes *N* ROs, which correspond to a specific number of multi-PRACH transmissions *N*, from *M* RO cell group(s) based on one of the options 1-3
1906
The UE sends one preamble in each of *N* ROs of the at least one RO UE group in one PRACH attempt by using the same beam or different beams
1900

Fig. 19

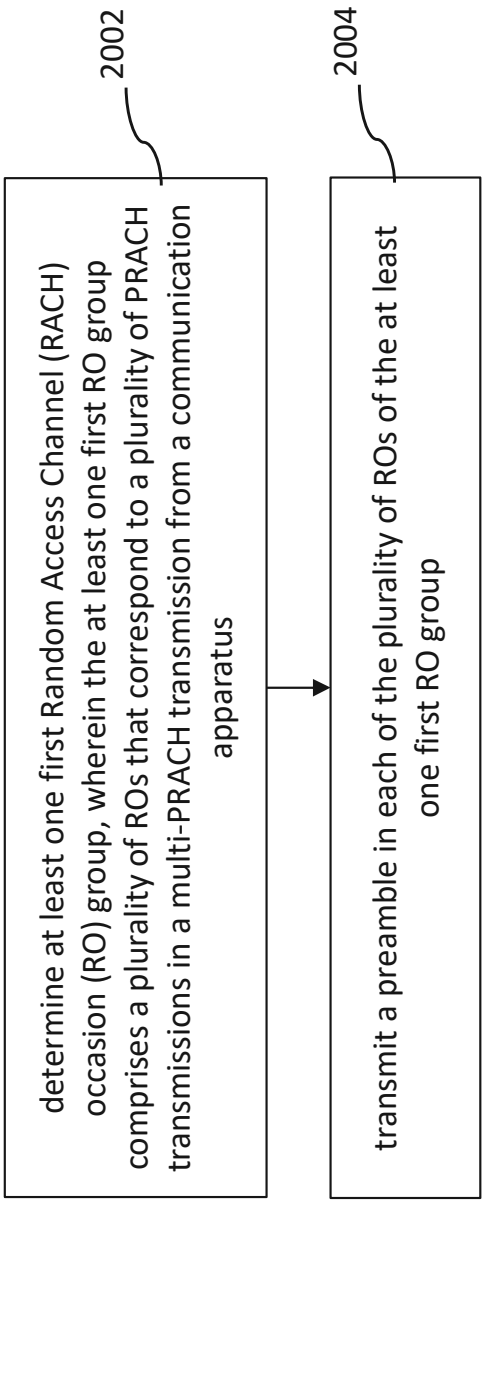

2002
2004
determine at least one first Random Access Channel (RACH) occasion (RO) group, wherein the at least one first RO group comprises a plurality of ROs that correspond to a plurality of PRACH transmissions in a multi-PRACH transmission from a communication apparatus
transmit a preamble in each of the plurality of ROs of the at least one first RO group
