

ABSTRACT OF THE DISCLOSURE

METALLIC PLATE MATERIAL FOR ELECTRIC/ELECTRONIC
INSTRUMENT AND ELECTRIC/ELECTRONIC INSTRUMENT USING SAME

A metallic plate material used as a material for, for example,
a casing for containing parts of an electric/electronic
5 instrument, which is good in earthing properties, shield
properties against electromagnetic waves, formabilities,
lubricity, sliding properties, and resistance to solvents. The
metallic plate material comprises a resin-coated metallic plate
material. The resin coating contains, as resin, at least one
10 substance chosen from a group consisting of acrylic-based resin,
epoxy-based resin, and urethane-based resin, and contains water
in the amount of 1 to 50 mass % and a lubricant in the amount of
0.1 to 20 mass %, and has a thickness of 0.05 to 5 μm .
