

**Download System of APP, Determination Method of Installation Type and Storage
Medium
Abstract**

5 This invention provides the download system of APP, determination method of installation
type and storage medium. The determination method of the installation types of APP includes:
obtaining the installation event of the target APP and the information of the target APP;
detecting the device features of the terminal where the target APP is installed and obtaining the
application list and application installation history of the terminal, wherein the application list
10 is used to record the information of the application existing in the terminal and the application
installation history is used to record the event of installing the APP in the terminal and the
information of the installed APP; judging the device type of the terminal according to the
device features; using the information of the target APP to match in the application list and
application installation history and get the installation status of the target APP in the terminal;
15 determining the installation type of the target APP according to the device type and installation
status. The scheme of this invention can enable the application program to identify the quality
of promotion channels.
