(54) Title: LIQUID AND STABLE OLEIN FRACTIONS

(57) Abstract: The present invention relates to a stable and liquid olein fraction wherein less than 8.6% of the TAG species of said olein fraction have the general formula SMS and at least 26% of TAG species of said olein fraction have the general formula SMM, wherein S represents a saturated fatty acid and M represents a monoenoic fatty acid, which olein fraction is obtainable by fractionation of a high oleic high saturated sunflower oil; and collecting the liquid fraction. The invention further relates to a method for preparation of a stable and liquid olein fraction by low temperature fractionation of a high oleic, high saturated sunflower oil.
