ABSTRACT

~~Disclosed in embodiments of the present application are a~~A positioning method ~~and apparatus. The method is~~ performed by a terminal device~~. The method comprises~~, includes: receiving pre-configured first positioning assistance information; and determining whether the first positioning assistance information is available; and using the first positioning assistance information in response to determining that~~when~~ the first positioning assistance information is available. ~~By implementing the embodiments of the present application, the problem of inaccurate positioning caused by positioning the terminal device by means of the pre-configured first positioning assistance information when the first positioning assistance information is unavailable can be avoided, and thus, a relatively accurate position of the terminal device can be obtained.~~
