

1/13

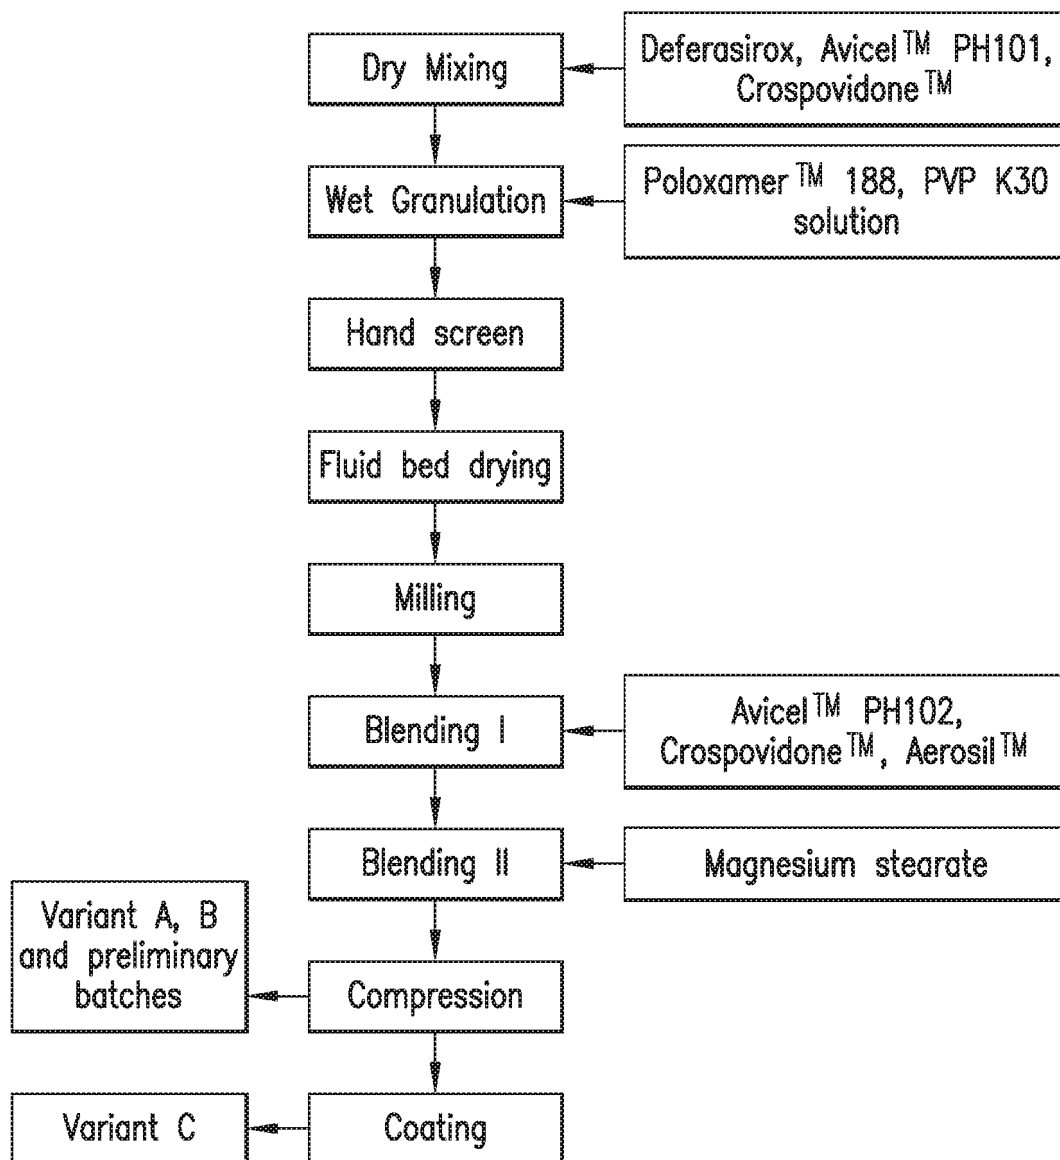

Manufacturing process of coated deferasirox
tablets prepared by wet granulation

FIG. 1

2/13

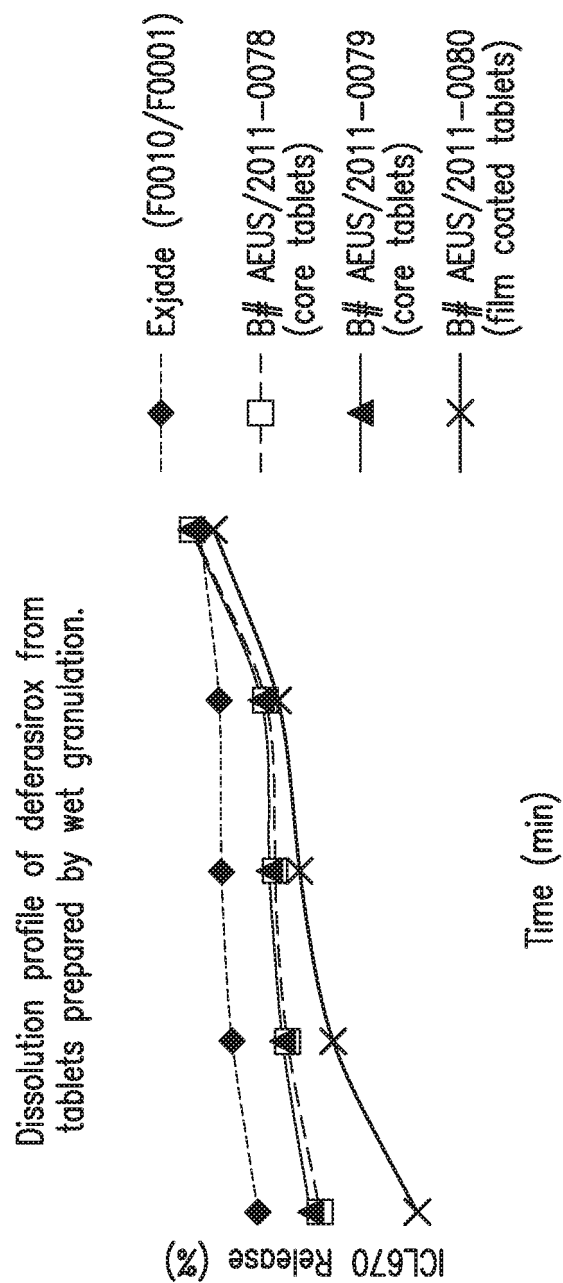

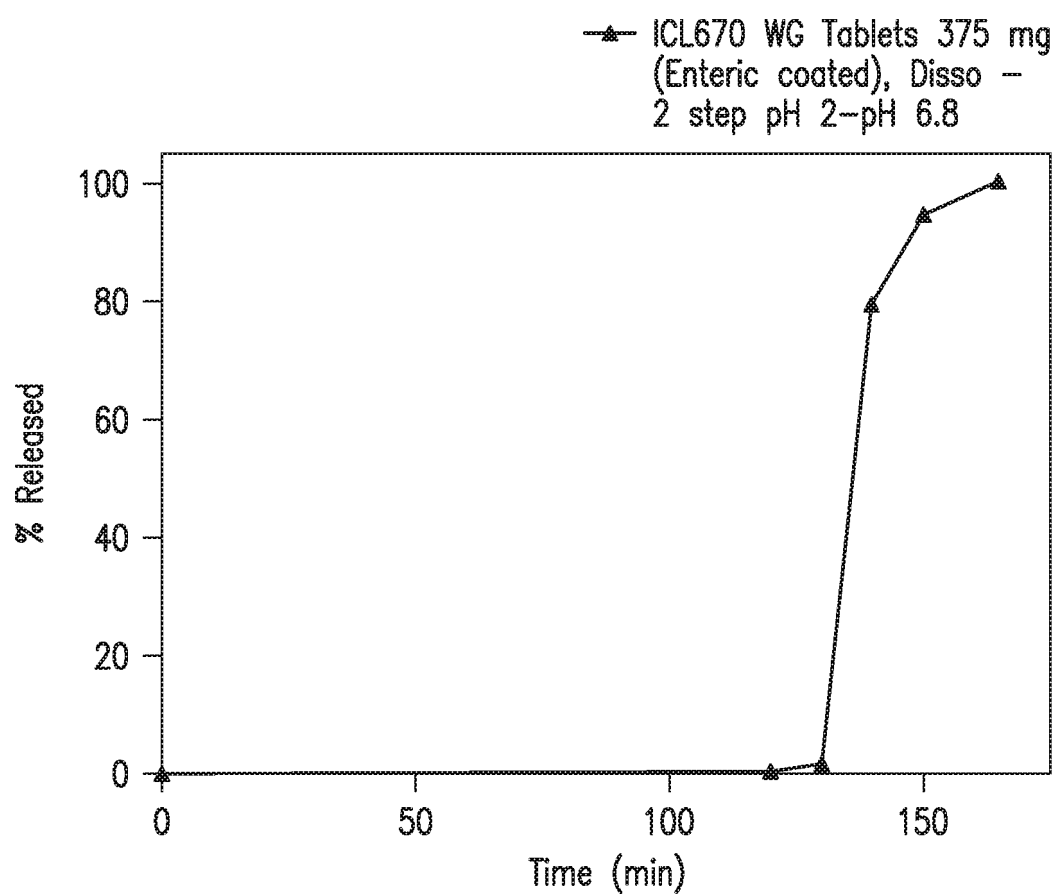

FIG. 2

3/13

Dissolution profile of ICL670 from enteric coated tablets
prepared by Wet Granulation

Dissolution profile of ICL670 375 mg
WG variant after enteric coating

**FIG.3**

4/13

Pharmacokinetic profiles of the commercial deferasirox tablets as well as those prepared using wet granulation technique

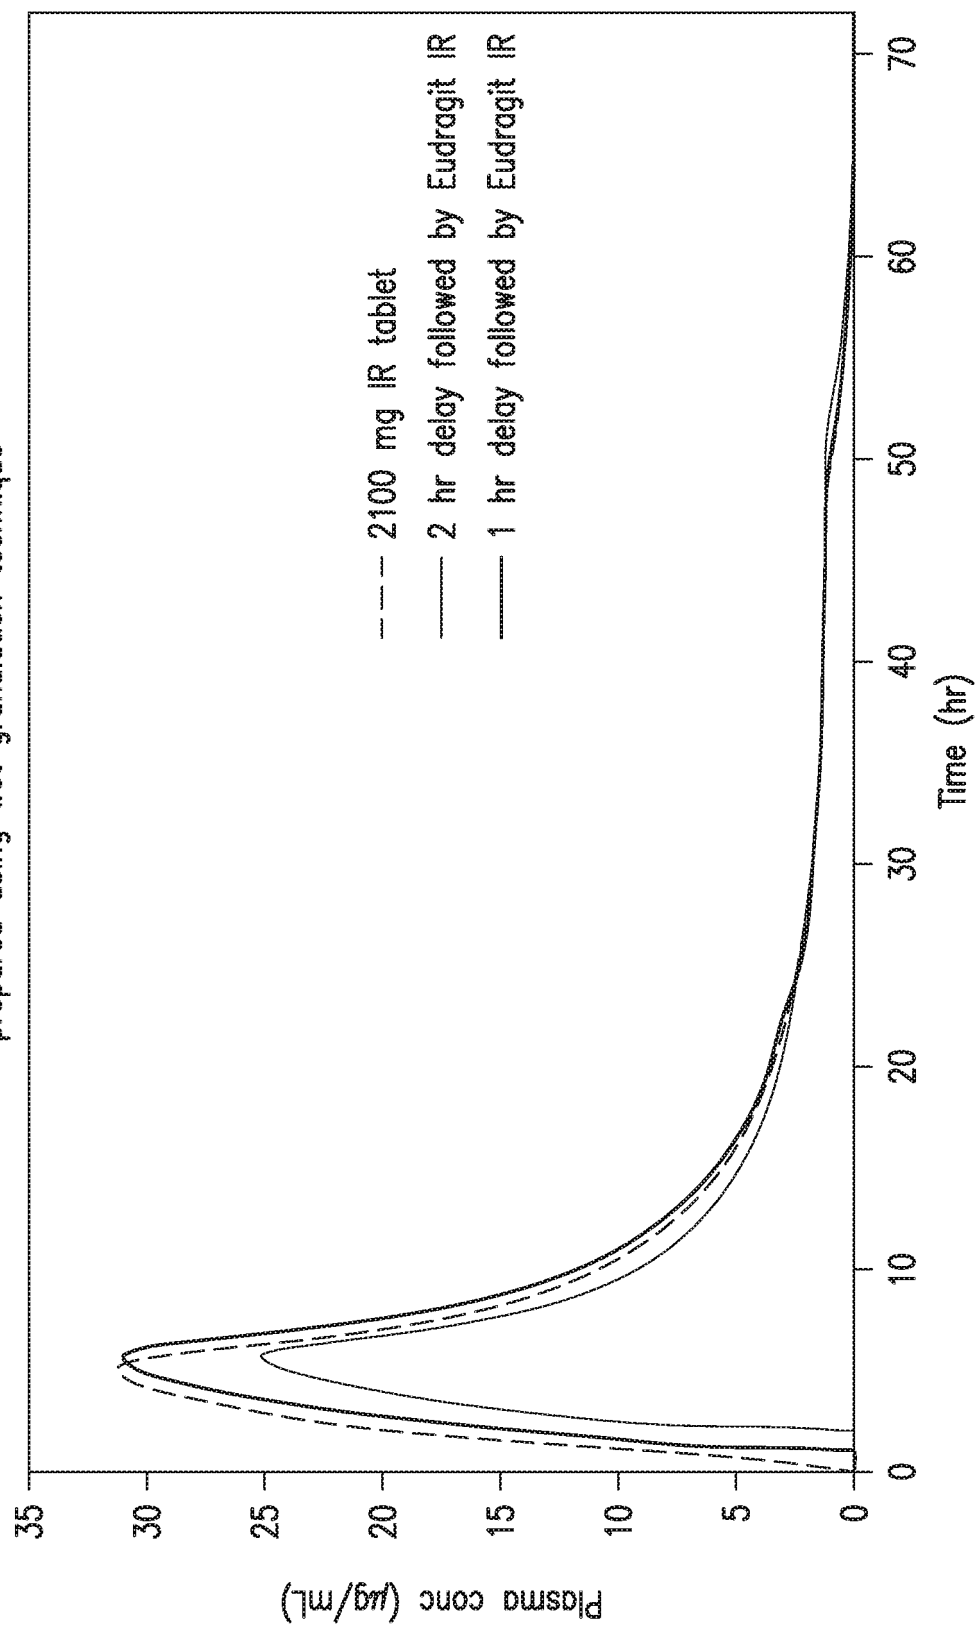

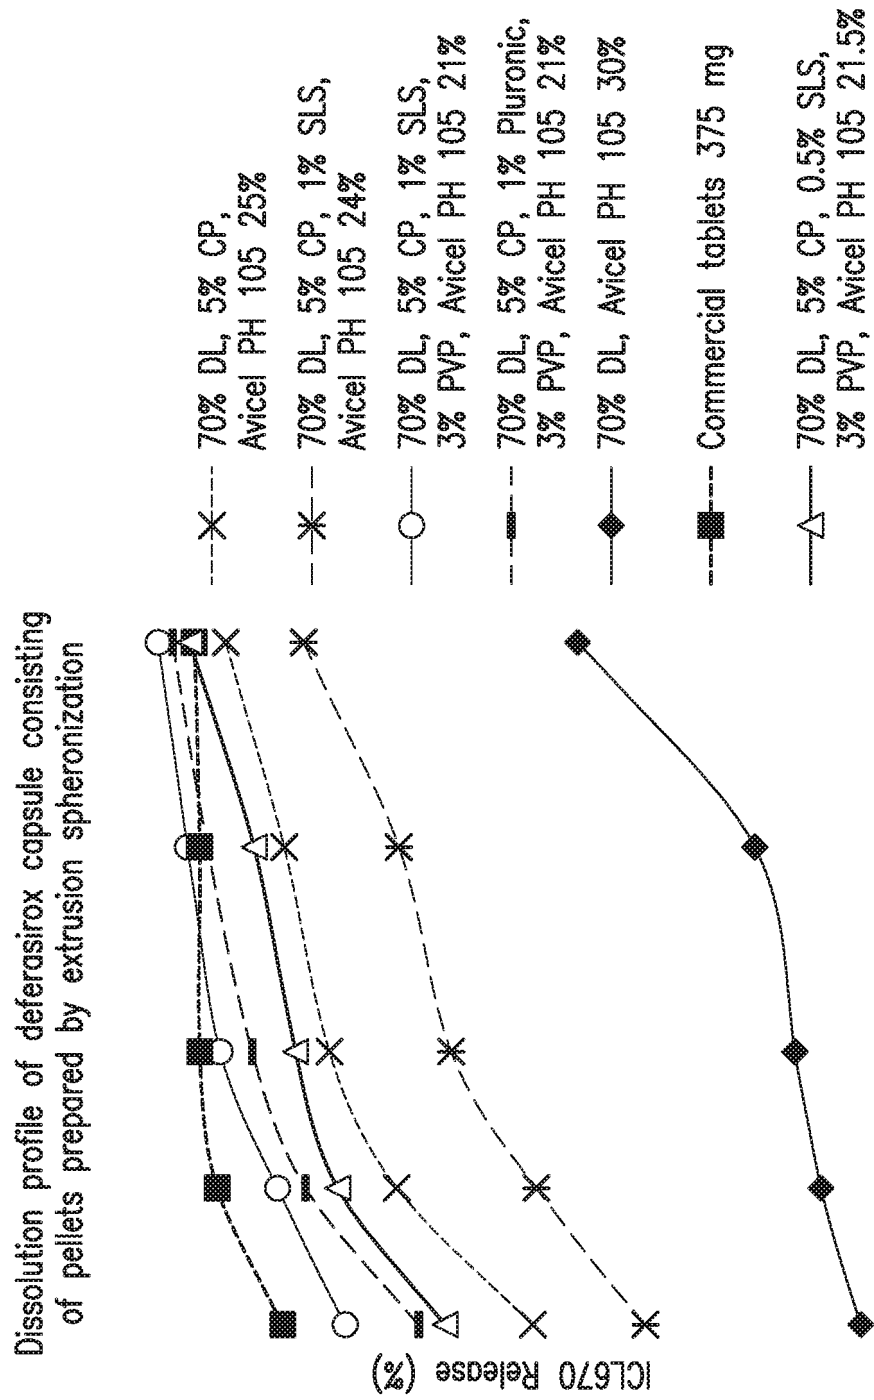

FIG.4

5/13

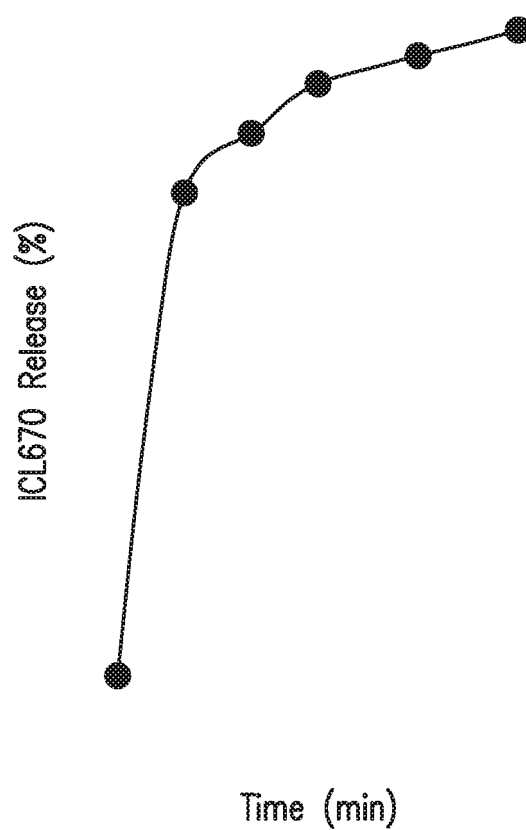

Time (min)

FIG.5

6/13

Dissolution profile of deferasirox capsules consisting of enteric coated pellets prepared by extrusion spheronization.

**FIG.6**

7/13

Deferasirox mean concentration–time profiles in Clinical Studies 1–4
F2101

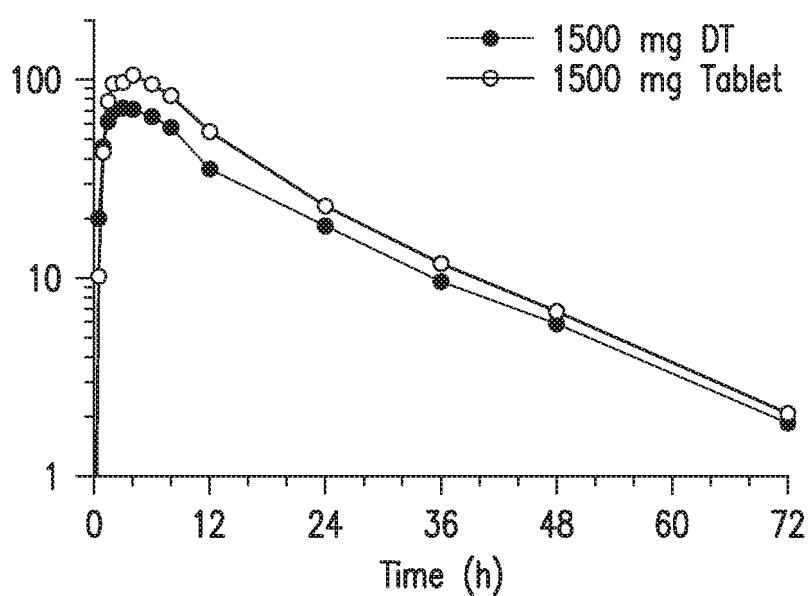

FIG.7A

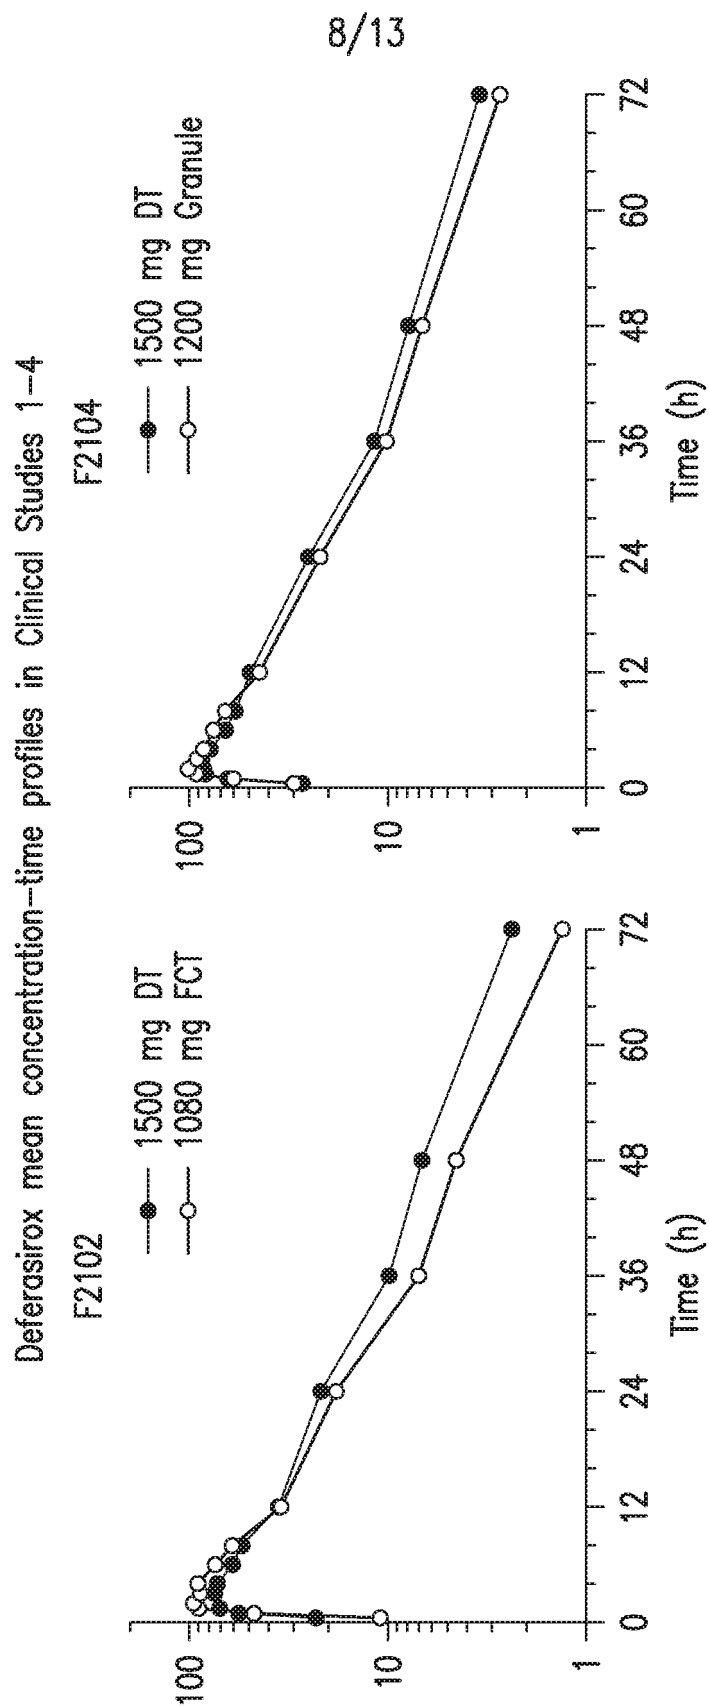

FIG.7B

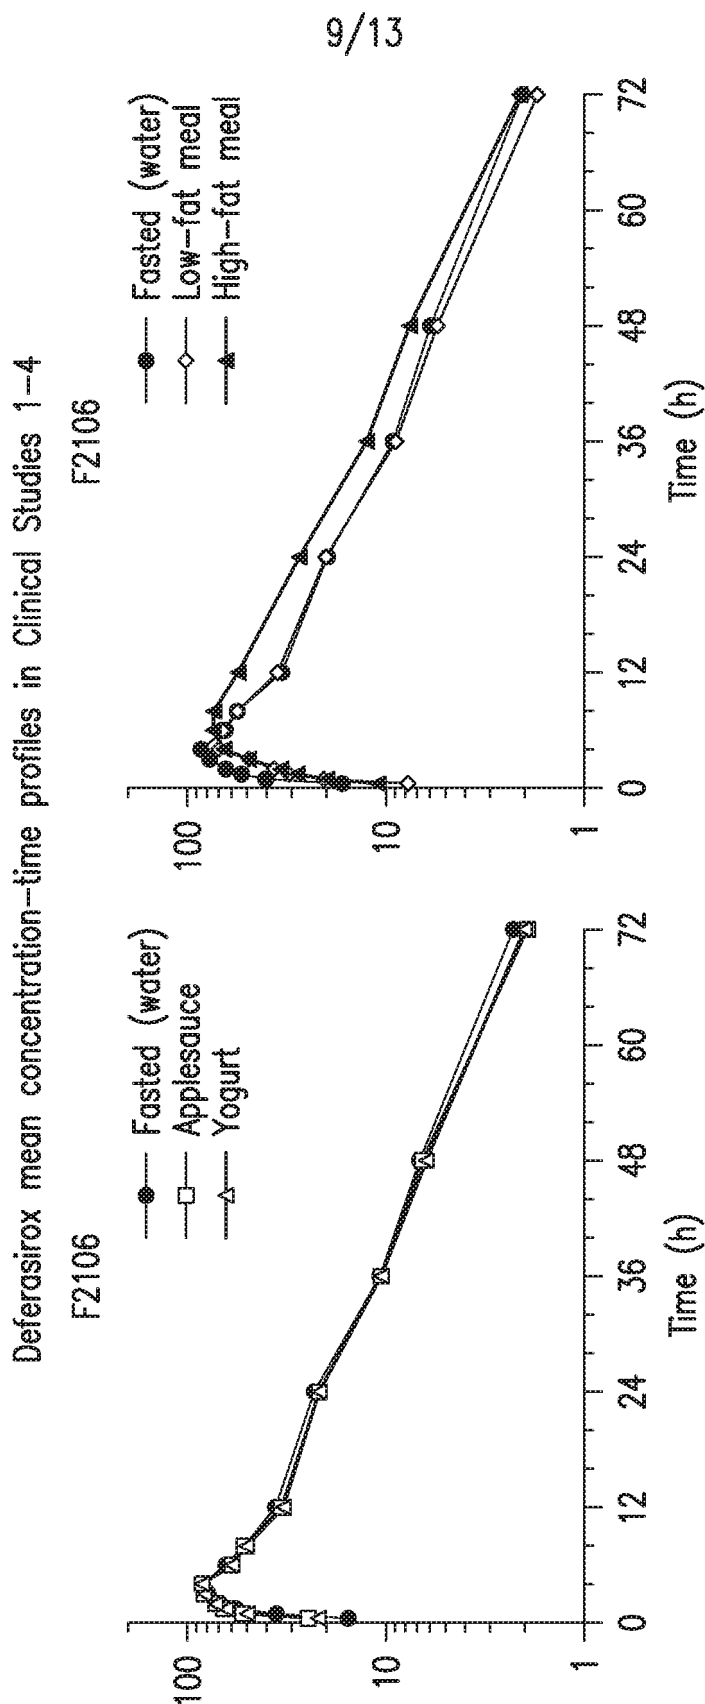

FIG.7C
