

METHOD FOR TREATMENT OF PARKINSON'S DISEASE

ABSTRACT

The present invention provides a method for treatment of a neurological or movement disorder, *e.g.*, Parkinson's disease, in an individual in need thereof, by parenteral administration of a composition comprising carbidopa and levopoda, or pharmaceutically acceptable salts thereof, and concomitant oral administration of a catechol-O-methyl transferase (COMT) inhibitor, *e.g.*, entacapone or tolcapone.
