CLAIMS

1. The use of one or more analgesic agents in the manufacture of a medicament for reducing frequency of voluntary urination in a subject in need thereof, wherein said one or more analgesic agents are the only pharmaceutically active agents in the medicament,

wherein at least one of said one or more analgesic agents is acetaminophen, and

wherein the medicament contains between 1 mg to 2000 mg of acetaminophen.

2. The use of Claim 1, wherein said medicament is formulated in a delayed-release formulation.

3. The use of Claim 2, wherein said delayed-release formulation comprises a material selected from the group consisting of hydroxypropyl methylcellulose, methylcellulose, methyl hydroxyethylcellulose, hydroxypropylcellulose, carboxymethylcellulose, acrylate copolymers, polyethylene glycols, polyvinylpyrrolidone, methacrylic acid copolymer, cellulose acetate phthalate, hydroxypropyl methylcellulose phthalate, hydroxypropyl methylcellulose acetate succinate, polyvinyl acetate phthalate, shellac, and ethylcellulose.

4. The use of Claim 2, wherein said delayed-release formulation further comprises glyceryl monostearate or glyceryl distearate.

5. The use of Claim 2, wherein said delayed-release formulation comprises a water insoluble capsule body closed at one end with an insoluble, but permeable and swellable hydrogel plug, wherein said plug comprises a material selected from the group consisting of polymethacrylates, erodible compressed polymers, congealed melted polymer and enzymatically controlled erodible polymers.

6. The use of Claim 2, wherein said delayed-release formulation comprises an enteric coating.

7. The use of Claim 1, wherein said medicament contains between 50 mg to 500 mg of acetaminophen.

8. The use of Claim 1, wherein said medicament contains between 500 mg to 2000 mg of acetaminophen.

9. The use of Claim 1, wherein said medicament contains between 100 mg to 1500 mg of acetaminophen.

10. The use of Claim 1, wherein said medicament contains between 250 mg to 1000 mg of acetaminophen.

11. The use of Claim 1, wherein said one or more of the analgesic agents are formulated in an immediate-release formulation.

12. The use of Claim 1, wherein said one or more analgesic agents further include a second analgesic agent selected from the group consisting of aspirin, ibuprofen, naproxen, naproxen sodium, indomethacin and nabumetone,

wherein said medicament contains between 1 mg to 2000 mg of said second analgesic agent.

13. The use of Claim 12, wherein said second analgesic agent is ibuprofen.

14. A pharmaceutical composition, comprising:
acetaminophen and ibuprofen, and
a pharmaceutically acceptable carrier,
wherein said acetaminophen and ibuprofen are the only pharmaceutically active agents in the pharmaceutical composition,
wherein each of said acetaminophen and ibuprofen is present in an amount between 1 mg to 2000 mg.

15. The pharmaceutical composition of Claim 14, wherein the said pharmaceutical composition is formulated for delayed release.
