(54) Title: METHOD AND PACKET SWITCHED COMMUNICATION NETWORK WITH ENHANCED SESSION ESTAB-
LISHMENT

(57) Abstract: The present invention is a method and a system for session establishment in a packet switched communication network. A method of session establishment in a packet switched communication network having a session establishment control entity in accordance with the invention includes at the session establishment control entity processing information to be transmitted from caller user equipment to callee user equipment during session establishment to produce session establishment information by removing from the information to be transmitted from the caller user equipment to the callee user equipment information which would slow the session establishment if transmitted to the callee user equipment during session establishment; storing the information removed from the information to be transmitted from the caller user equipment to the callee user equipment; and completing session establishment by transmitting the session establishment information to the callee user equipment which is processed by the callee user equipment to complete session establishment.
