(54) Title: PRESSURE RELIEF DEVICE

(57) Abstract: A pressure relief device (10) connected to a canister (11) with a heating device positioned within and with said pressure relief device (10) designed to activate to relieve unsafe pressure built up within said canister (11). The canister (11) forms part of open flow system and when in operation said system provides a continuous flow of heated water at an outlet (13) with said system being fed continuously with an inflow of water from an inlet (12) at ambient temperature. The pressure relief device (10) is simple in design and with minimal parts. Additional the pressure relief device (10) can be reset easily by the user after said device has been activated.
