SUPERABSORBENT RESIN COMPOSITION

ABSTRACT OF THE DISCLOSURE

A superabsorbent resin composition comprising following components (A), (B) and (C), or components (A) and (D)

(A) a superabsorbent resin,

(B) a metal compound containing at least one metal A selected from the group consisting of titanium and zirconium,

(C) a chelating agent, and

(D) a coordination compound in which component (C) is coordinated with metal A.
