

ABSTRACT

There is provided a resin composition for a lens, which contains a photocationic polymerization initiator (X) including
5 a salt formed from an anion represented by General Formula (1) and a cation and contains an epoxy compound (Y) containing two or more epoxy groups in a molecule. (In General Formula (1), R¹ to R⁴ each independently represent an alkyl group having 1 to 18 carbon atoms or an aryl group having 6 to 14 carbon atoms.)
