

ABSTRACT

A multilayer antifouling coating film produced by layering an underlayer antifouling coating film (X) and an upper-layer antifouling coating film (Y), wherein: the underlayer antifouling coating film (X) contains a hydrolyzable polymer (A1) and an organic antifouling agent (B1), the upper-layer antifouling coating film (Y) contains a hydrolyzable polymer (A2), and the organic antifouling agent (B1) is at least one selected from 4-bromo-2-(4-chlorophenyl)-5-(trifluoromethyl)-1H-pyrrole-3-carbonitrile and 4,5-dichloro-2-n-octyl-4-isothiazolin-3-one.
