(54) Title: A TELECOMMUNICATIONS NETWORK ACCESS DEVICE

(57) Abstract: A telecommunications network access device includes a plurality of ports that can each receive an interface from a telecommunications device, the device operating in terms of an associated protocol and being arranged to transmit data in a format associated with the protocol. A USB port. A translator for converting the data into a format suitable for a telecommunications device or communications network that the network access device is connected to, the conversion of data being dynamically configurable.
