(54) Title: OPHTHALMIC COMPOSITIONS

(57) Abstract: The invention is generally related to topical ophthalmic compositions comprising: from about 0.05 w/v% to about 5 w/v% of galactomannan polymer; a cis- diol and about 0.5 w/v% to about 10 w/v% of a hydrophilic copolymer which comprises (a) arylborono-containing repeating units each having a boronic acid, (b) repeating units of at least one phosphorylcholine-containing vinylic monomer, and (c) acrylic monomeric units of at least one acrylic monomer having 3 to 16 carbon atoms, the ophthalmic composition is substantially free of a borate for improving lubrication, hydration and drug delivery property.
