

ABSTRACT

[Problem] An object of the present invention is to provide a compound which has high storage stability and is suitable for use as a drug substance.

- 5 [Solution] The present invention relates to a succinate salt of 1-{[(4aR,6R,8aR)-2-amino-3-cyano-8-methyl-4,4a,5,6,7,8,8a,9-octahydrothieno[3,2-g]quinolin-6-yl]carbonyl}-3-[2-(dimethylamino)ethyl]-1-propylurea, which is suitable as a drug substance having excellent storage stability and crystallinity and is useful for the treatment or prevention of Parkinson's disease, restless legs syndrome,
- 10 hyperprolactinemia or the like.
