(54) Title: VISCOUS FOOD AND BEVERAGE DISPENSING SYSTEM

(57) Abstract: A food or beverage delivery system com-
prising at least one disposable or recyclable package (10)
containing viscous food therein; a dispensing apparatus
having a holder (3) for holding the food package (10) and
a pressure-displacement device (2) that forces the food
out of the package; and a valve; wherein the food pack-
age comprises an outlet portion (4) which is part of the
package, and wherein the valve is adapted to act in clo-
sure on the outlet portion (4) to cut off portions of food
coming out of the package without the food contacting
the apparatus. The system may deliver frozen confec-
tion more hygienically with or without flavourings. The
frozen confection may be a layered product with flavour-
ing forming separations, bottoms or toppings. It may also
be used to more accurately dose viscous beverage con-
centrates in a beverage dispenser.
