(54) Title: SYSTEM AND METHOD OF PROVIDING COMPUTER RESOURCES

FIG. 1B

(57) Abstract: A data center system can include a mobile support structure; one or more enclosures for removable electronic equipment where the enclosures are housed by the support structure; a cooling system in fluid communication with the enclosures for cooling of the electronic equipment where the cooling system is housed by the support structure; and a power system operably connected to the electronic equipment and the cooling system for supplying power thereto where the power system comprises a generator housed by the support system. The mobile data center can be moved to remote locations, and the electronic equipment can be placed in communication with a network when at the remote location Other embodiments are disclosed.
