(54) Title: NEGOTIATING CAPABILITIES BETWEEN A WIRELESS SINK AND A WIRELESS SOURCE DEVICE

FIG. 5A

(57) Abstract: As part of a communication session, a wireless source device can transmit audio and video data to a wireless sink device, and the wireless sink device can transmit user inputs received at the wireless sink device back to the wireless source device. In this manner, a user of the wireless sink device can control the wireless source device and control the content that is being transmitted from the wireless source device to the wireless sink device. As part of establishing the communication session, the wireless sink device and the wireless source device may perform capability negotiation.
