CLAIMS

1. A confirming method of membership, comprising:

identifying, under a visible light, a physical arrangement of whole diamonds arranged in a single product, the physical arrangement designed to exhibit grace and beauty as a whole product;

identifying, under ultraviolet radiation, an arrangement of a diamond or diamonds having a blue fluorescence equal to or stronger than strong blue in the physical arrangement of the whole diamonds; and

distinguishing the single product including the whole diamonds having a blue fluorescence equal to or stronger than strong blue, from a group of the single product at least partly including a diamond or diamonds not having a blue fluorescence equal to or stronger than strong blue in the whole blue diamond.

2. An ornamental device comprising: whole diamonds arranged in a single product in a specific physical arrangement designed to exhibit grace and beauty as a whole product,

the whole diamonds on the single product having a blue fluorescence equal to or stronger than strong blue, so that the whole diamonds on the single product form a clear visibility of the specific physical arrangement under a visible light, and form a blue visibility of the specific physical arrangement under ultraviolet radiation, wherein an arrangement of the blue visibility coincides with an arrangement of the clear visibility, the ornamental device excluding a diamond not having a blue fluorescence equal to or stronger than strong blue.
