

ABSTRACT

Provided are a configuration updating method and apparatus, a device, and a storage medium. The method is applied to an edge device and includes that: identification information of a configuration file to be updated in the edge device and first version information of the configuration file are acquired, the configuration file at least including an image, collected by a collection apparatus, of a game region and a parameter of the collection apparatus; second version information of a configuration file in a cloud server is acquired based on the identification information; the configuration file of the second version information is acquired from the cloud server in a case where the second version information is higher than the first version information; and the configuration file in the edge device is updated with the configuration file of the second version information.
