(54) **Title:** CONVEYER SYSTEM

(57) **Abstract:** An OHT conveyer vehicle places a FOUP (110) on platforms (42a and 42b). A platform (61) is moving to a position overlapping with the platform(42a and 42b) by a moving device (63), and then to a position at which an upper surface of the platform (61) is above upper surfaces of the platforms (42a and 42b) by elevation device (62). Therefore, the FOUP (110) is placed on the platform (61). Subsequently, the platform (61) is moving to a position overlapping with platforms (14a and 14b) by the moving device (63), and then to a position at which the platform(61) is lower than the platforms (14a and 14b) by the elevation device (63). Therefore the FOUP (110) is placed on the platforms (14a and 14b).
