

Spinning Reel for Fishing

[Document Name] Abstract

[Abstract]

[Object] To simplify a connecting structure between a drive gear shaft and a handle shaft and to reduce the cost thereof.

[Solution] A spinning reel 100 for fishing includes a reel body 1 and a handle 3 that is removably provided in the reel body 1. The spinning reel 100 further includes: a drive gear shaft 2 provided in the reel body 1; a ball bearing 15, 16 that is externally fitted on the drive gear shaft 2 and rotatably supports the drive gear shaft 2; and a handle shaft 31 that is provided in the handle 3 and screwed to the drive gear shaft 2. On the handle shaft 31, a contact portion 36 is integrally provided and contacts an inner ring of the ball bearing 15, 16 by means of the screwing to the drive gear shaft 2.
