(54) Title: METHOD FOR KNITTING MANUFACTURED ARTICLES WITH HIGH-FINENESS CIRCULAR KNITTING MACHINES

(57) Abstract: A method for knitting manufactured articles with circular knitting machines, particularly high-fineness circular knitting machines, which consists in that at least once during the formation of the manufactured article the number of active needles is reduced by transferring the last loop of knitting formed by certain needles to contiguous needles and thus excluding from knitting the needles that have transferred the loop of knitting during the formation of at least one subsequent row of knitting by the other needles that are kept active. This provides a manufactured article which has regions knitted with a certain number of needles and regions knitted with a smaller number of needles, obtaining particular transparency or shaping effects on the manufacture.
