(54) Title: METHOD AND APPARATUS FOR EXECUTING PL/SQL STORED CODE OBJECTS IN A DATABASE

(57) Abstract

A system, method and database development tool are disclosed for automatically generating parameters for use in executing a stored code object in a data base, by parsing source codes (Fig. 1) derived from existing database (Fig. 1, 13) which represents stored code object, wherein the parameters may represent complex data types (Fig. 1, 17).
