

Abstract

The present invention relates to a stable pharmaceutical composition of a receptor agonist, a preparation method therefor and the use thereof. In particular, the present invention discloses a pharmaceutical composition having a dual-receptor agonist as an active ingredient. The pharmaceutical composition comprises a dual-receptor agonist buffer solution, an osmotic pressure regulator and a pH regulator. The pharmaceutical composition of the present invention has good drug stability and safety, and the preparation method is simple and convenient, and suitable for industrial production.
