(54) Title: UNATTENDED AUTOMATED SYSTEM FOR SELLING AND DISPENSING

(57) Abstract

A system for an unattended automated service station for selling and dispensing products, primarily motor fuels from a service island. The system includes fuel dispensing device (35), card reading device (51), coin and currency acceptor devices (43, 45), card verification device (27), coin and currency dispensing devices (47, 49), receipt printing device (55), processor control device (39), fuel activating and selection device (31), display device (57), audio device, and a data transmission device (33). The components interact to enable a customer to select a specific fuel or product purchase through any combination of coins or currency, have the fuel dispensing automatically activated, enable delivery of a preselected quantity of fuel, provide a cash or credit card receipt, and provide other information concerning other products or services for sale during the fuel delivery process.
