

PACKAGING ARRANGEMENT FOR CONTACT LENSES

1

ABSTRACT OF THE DISCLOSURE

A plurality of disposable hydrophilic contact lenses are contained in at least one array of individual packaging arrangements housed in an upper compartment of a box-like container or carton having a partition therein forming upper and lower compartments. This will enable the carton which is designed for large quantities of packaging arrangements to store a limited or sample-sized supply of packaged contact lenses for use by a consumer over a relatively short period of time.
