

**LETTUCE PLANTS HAVING RESISTANCE TO *NASONOVIA RIBISNIGRI*/BIOTYPE
NR:1**

ABSTRACT

Lettuce (*Lactuca sativa*) plants exhibiting resistance to *Nasonovia ribisnigri* biotype Nr:1 are provided, together with methods of producing, identifying, or selecting plants or germplasm with a *Nasonovia ribisnigri* biotype Nr:1 resistance phenotype. Such plants include lettuce plants comprising introgressed genomic regions conferring pest resistance. Compositions, including novel polymorphic markers for detecting plants comprising introgressed loci, are further provided.
