(54) Title: DIGITAL TELEVISION AND / OR AUDIO RECEPTION DEVICE AND MOBILE PROCESSING UNIT

(57) Abstract: A digital television and / or audio reception device (100) is disclosed comprising a receiving unit adapted to receive a digital television and / or audio signal, the signal including an additional data stream for content (250) to be presented by a mobile processing unit (200), in particular a mobile phone (200), an output unit for a first display means (102), in particular a television set, connected to or integrated with the digital television and / or audio reception device (100), the output unit adapted to output a signal for the display of a first plurality (110, 120) of selectable items on the first display means (102), and a transceiver unit adapted to send electromagnetic signals (150) to the mobile processing unit (200), the electromagnetic signals (150) causing a second display means (202) of the mobile processing unit (200) to display a second plurality (230) of selectable items, wherein the second plurality (230) of selectable items depend on a selected one of the first plurality (110, 120) of selectable items displayed by the first display means (102).
