

[ABSTRACT]

The present disclosure relates to a microorganism producing *O*-acetylhomoserine with high efficiency and a method for producing *O*-acetylhomoserine and *L*-methionine using the microorganism. The present disclosure provides a microorganism producing *O*-acetylhomoserine having an enhanced activity of a protein which is predicted to export *O*-acetylhomoserine, and a method for producing *O*-acetylhomoserine and *L*-methionine using the microorganism.
