(54) Title: BIOMETRIC AUTHENTICATION METHOD, SYSTEM, AND COMPUTER PROGRAM

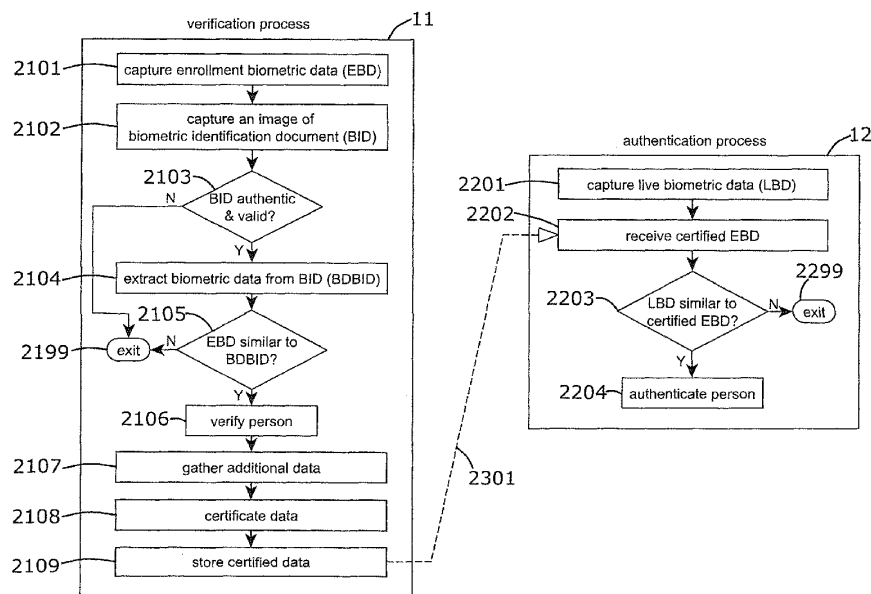

Fig. 2

(57) Abstract: Authentication method and system using biometric data of a person. The method is flexibly usable on a plurality of distinct verification and authentication devices and comprises a verification process and an authentication process. First biometric data is captured by the verification device and compared to official biometric data. Captured and inputted data is certified and stored. At time of a required authentication of the person, live biometric data of the person is captured and compared to first biometric data. If the data is similar, the person is automatically authenticated.
